

Relay

One school. One app.
Every register, every mark, every message — reaching the people they were for.

A PROPOSAL FOR SCHOOL OWNERS AND MANAGEMENT

In English, Hindi and Marathi · on any phone · with a live demo school you can log into today.

September 2026

THE SCHOOL TODAY

Your school already creates all of this data every day. Then it disappears.

Paper registers

Attendance sits in bound registers: slow to total, impossible to search, gone when the year ends. A parent hears about an absence days later, or never.

WhatsApp groups

School-to-home messages live in teachers' personal chats. No record the school keeps, no privacy for the child, and the message that matters is buried by 9 a.m.

Diaries and notice boards

Homework, events and circulars reach only the child who happened to write them down. The office never knows which family actually read the notice.

Marks in Excel

Every teacher keeps their own sheet. Report cards are retyped, totals are wrong, and last year's marks are on a laptop that has since been replaced.

Fees chased by phone

Who has paid, who is due, who was promised a concession: known to one clerk, on one ledger. Collection lags because reminders are manual.

A staff room you cannot see

Who is in today, who is on leave, who is free to cover 7B at eleven: decided in the corridor, remembered by nobody.

WHAT IT COSTS THE OWNER

The bill arrives as complaints, lost admissions and hours nobody counted

Families judge you by what reaches them.

A notice unseen, a mark late, an absence unreported: each one is a conversation at the gate and a review told to five other parents.

You cannot answer the question you are asked.

"How was her attendance last year?" "Who marked this paper?" "When was the fee reminder sent?" Without a record, the honest answer is a shrug.

Teachers spend teaching hours on clerical work.

Totalling registers, retyping marks, forwarding the same notice to eight groups: an hour a day per teacher that the timetable never sees.

You see only what is reported to you.

By the time a problem reaches the owner's desk it has already been a problem for a term.

THE QUESTION THAT DECIDES IT

"Who is taking 7B's English right now?"

If the office has to walk to the classroom to find out, the school is running on memory. Everything on the following slides exists so that this question, and a hundred like it, is answered from a phone in under a minute.

WHY THE USUAL SOFTWARE HAS NOT FIXED IT

Most school software is a portal nobody opens

Built for the office, not the classroom

Data entry happens after the day, on a laptop, by a clerk. The teacher who has the information never touches it, so it is late and thin.

English only, desktop first

Half the families and many of the staff are shut out on day one. An app that does not speak Hindi or Marathi is not a school app in Maharashtra.

Needs a signal

A classroom with no network is a classroom the software cannot see. Registers taken on paper 'for now' are never typed in.

Priced by the module, holds your money

Every feature is a separate licence with its own bill, and fee gateways route your parents' money through the vendor's account first.

Your data, their lock

Records that cannot be exported, a vendor that cannot be left, and a report card that changes after it was sent.

A feature list, not a day

Two hundred modules and no answer to the morning's actual question: who is in, who is away, what does each family need to know today.

WHAT MAKES RELAY DIFFERENT

Relay is the tool the school uses to run the day. The record is a by-product.

ONE ENTRY, MANY USES

Created where the work happens

The teacher takes the register on a phone in the classroom. The absence alert, the monthly percentage and the year's history all come from that one tap.

FIVE DOORS, ONE RECORD

Every role, any phone

Owner, principal, office, teacher, parent and pupil each have their own door. Android app and web app; installs from the browser with no store visit needed.

THE FAMILY'S LANGUAGE

English, Hindi and Marathi throughout

Every screen, every message, every notice: each person reads Relay in their own language, and a circular goes out in the family's.

OFFLINE FIRST

Works without a signal

Registers and marks are taken offline and sync when the network returns. A no-signal classroom is still a classroom.

YOUR MONEY STAYS YOURS

Money never touches Relay

Fees go straight to the school's own UPI id or gateway account. Relay records the due, the receipt and the reminder; it never receives or holds a rupee.

TRUST YOU CAN INSPECT

Your data, fenced and exportable

Every school's records are isolated by the database itself, every change is audited, and any table exports to Excel whenever you ask.

WHO USES IT

One login per person, a view per role

Owner / Principal	Whole-school dashboards: attendance, syllabus coverage, fees due, incidents open, who is away and who is covering. Approves leave, runs teacher reviews.
Office (Admin)	People, classes, timetable, calendar, fees, circulars, messaging, staff attendance, substitutions, settings. The desk that runs the school.
Teacher	Register, assignments, marks, lesson plans, incident records, parent messages, own attendance and leave: the day, on a phone, offline if needed.
Parent	Every child on one account, across schools: attendance, homework, marks, report cards, fees, health card, circulars to acknowledge, messages with the teacher.
Pupil	Own login with a handle, no email needed: assignments with photo hand-ins, timetable, results, practice ladders and badges.

Every person sees exactly what they need and nothing they do not. A parent never sees another child; a teacher never sees another class's register.

EVERY FEATURE, FOR EVERY ROLE

Owner and Principal

The whole school on one screen. See the school as it is this morning, not as it was reported last month.

See

- Overview: attendance today, registers still to take, marks pending, fees due
- Syllabus coverage per class and subject against where the year stands, with classes behind flagged
- Staff register: who is in, late, on leave; the month per person
- Open incidents, circular reach, enquiries waiting
- Past years' archive: every record preserved

Decide

- Approve leave with cover suggested in the same step
- Substitution board: assign who covers each lesson of an absent teacher
- Teacher review rounds with pupil and parent feedback
- Publish or hold circulars; see who has acknowledged
- Set the teaching week, terms and holidays the whole app follows

Answer

- Audit trail: who changed what, when, including failed logins
- Any table to Excel or CSV in one click
- Frozen report cards and leaving certificates that cannot silently change
- Health cards and incident history per pupil, for the inspector and the parent
- School profile, moderated feed and vacancies on the network; enquiries from families
- Book verified experts from the marketplace

EVERY FEATURE, FOR EVERY ROLE

The Office

The desk that runs the school, without the ledgers. Set up in minutes from the Excel sheets you already have; then run the year from one place.

People and classes

- Import pupils and staff from Excel; invites and join codes in three languages
- Classes, sections, form teachers and subject teachers
- Year-end promotion, transfers and leaving certificates in one step
- Guardian links: one parent, several children, several schools

The year

- Timetable builder with clash checks and a configurable teaching week
- Calendar: terms, holidays, exam windows the registers respect
- Exams, marks entry and report cards weighted into the term
- Syllabus lists per grade and subject; coverage tracked per class
- Staff attendance marked at the desk or by each person's own check-in

Money and messages

- Fee structures, dues, concessions, receipts and claims; UPI or the school's own gateway
- SMS and WhatsApp broadcasts with fixed, DLT-safe templates in en, hi, mr
- Circulars with a reach report and a once-a-day reminder to whoever is silent
- Substitutions, incidents, health checks, safety settings

EVERY FEATURE, FOR EVERY ROLE

Teachers

The day, on a phone, in the classroom. Nothing to type in after school. What a teacher does in class is the record.

Every morning

- Register in under a minute, offline if needed; absences alert parents the same day
- Today: lessons, covers assigned by the office, marks pending, registers left
- "I'm in": own check-in, late or on time by the school's clock
- Timetable with the week's cover shown in place

Teaching

- Assignments with handouts; hand-ins typed or photographed on the phone
- Marks entered once, weighted into the term automatically; marks sheet import from Excel
- Lesson plans logged as taught, moving the syllabus along
- Practice ladders and quizzes for the class

Families and self

- Messages with parents that the school keeps a record of
- Parent–teacher meeting slots families book themselves
- Incident records with guardians notified; health flags on the roster
- Leave requests with the balance visible; own attendance for the month

EVERY FEATURE, FOR EVERY ROLE

Parents

Every child, every school, one account, their own language. The parent's phone, in Hindi, Marathi or English, tells them what the diary never did.

Know today

- Absence alert the morning it happens; attendance month by month
- Homework set and due, with the child's hand-in visible
- Marks as they are entered; report cards frozen at issue
- Timetable, and who is covering when a teacher is away

Take part

- Circulars to read and acknowledge with one tap; reminders only if silent
- Messages with the class teacher, kept on record
- Book a parent–teacher meeting slot
- Feedback in teacher review rounds
- The school's feed: celebrations, notices and pupils' work, moderated before it is seen

Trust

- Fees due, pay to the school's own UPI or gateway, receipt in the app
- Health and emergency card the parent keeps current
- Incident reports with what the school did
- Consent gates for anything that leaves the school; the record follows the child across schools

EVERY FEATURE, FOR EVERY ROLE

Pupils

A login of their own, and a stage to grow on. A handle, not an email. Assignments, results and practice that shows where they stand.

Schoolwork

- Today's lessons and what is due
- Assignments with attachments; hand in typed work or a photo from the camera
- Results and report cards, exam by exam
- Timetable, including cover teachers

Growth

- Unlimited quizzes and practice ladders: attempt as often as they like, with mastery levels and badges
- Cross-school competitions any school can enter
- Mentoring with visiting experts, behind the school's consent gate
- An account for life: after leaving, the record, quizzes, competitions, experts and feed stay open as an alumnus

Voice

- Feedback on teachers in review rounds, anonymous to the teacher
- School bulletin: celebrations and notices, moderated
- Messages with teachers where the school allows
- Past years' work and marks, kept

BEYOND THE CLASSROOM

One school on a network of schools, and a pupil for life

THE FEED

School social media

A moderated feed for every school and a shared feed across all of them: celebrations, notices, pupils' work and events. Nothing reaches a family until a staff member has approved it, and photos of minors sit behind guardian consent. Your school's profile is the page prospective parents find first.

PRACTICE WITHOUT LIMIT

Unlimited quizzes

Teachers set as many quizzes as they like; pupils attempt as often as they like. Practice ladders with mastery levels and badges, built for the child who is first in class and has never learned where they stand beyond the town.

BEYOND THE SYLLABUS

Expert marketplace

Verified visiting experts, from working engineers to artists and doctors, listed on the platform and bookable by any school for a talk, a workshop or mentoring. Checked before they are listed; every session behind the school's consent gate.

AFTER THE LAST DAY

Alumni for life

A pupil who leaves keeps their login. Their record, report cards and certificates, the quizzes and ladders, the competitions, the experts and the school feed all stay open to them as an alumnus, and the record follows them to the next school.

COMMUNICATION THAT REACHES

A circular is not sent until it is seen

Every notice carries a reach report: which family was told, which has seen it, which has acknowledged, and who is still unreached. The office reminds the silent once a day; the class teacher gets a printed list of who to chase.

Told

Push, SMS or WhatsApp went out, in the family's language

Seen

The parent opened it on their phone

Acknowledged

One tap: "seen and understood"

Unreached

No app, no phone on file: the printed list for the teacher

SMS and WhatsApp, three languages

Fixed templates for absence, fees due, exam dates, circulars, incidents and emergencies, in English, Hindi and Marathi, with the school's name. DLT-ready for India.

Messages the school keeps

Teacher–parent conversations live in Relay, not in personal chats: private to the family, on record for the school, searchable next year.

Broadcasts with reasons

Send to a class, a grade or the whole school. Every skipped number says why: no phone on file, opted out, or the child has left.

FEES, WITHOUT HANDLING MONEY

Relay never receives or holds a rupee

Fee structures are published per grade; each pupil sees what is due, with concessions the office granted. A parent pays to the school's own UPI id or through the school's own payment gateway account. Relay creates the order, hears the confirmation, issues the receipt and updates the ledger. The money goes from the parent to the school and nowhere else.

Structures and dues

Heads, instalments, due dates, concessions; a dues list per class the office can act on

Pay and receive

UPI or the school's gateway; receipts numbered and frozen; claims for cash paid at the desk

Chase without calls

Fee-due reminders by SMS or WhatsApp in the family's language, with the amount and date

See collection

Collected, due and overdue on the owner's overview; every table to Excel

WHY THIS MATTERS TO AN OWNER

- No settlement delay: the money is in the school's account the moment the parent pays
- No platform commission on fees, ever
- No dispute about a receipt: it is numbered, frozen and in the parent's app
- A gateway change is a settings change, not a migration
- Tested for the hard case: twenty parents paying the same instalment at once

RUNNING THE STAFF ROOM

Who is in, who is away, who is covering

EVERY MORNING

Staff attendance

Marked at the desk or by each person's own "I'm in" tap, late or on time by the school's own clock. The month per person, with leave showing itself.

BEFORE THE DAY

Leave with cover

Requests against a visible balance; approval suggests who is free, and the cover appears on the timetable the moment leave is granted.

AT ELEVEN O'CLOCK

Substitution board

Every lesson of an absent teacher, who is standing in, and a ranked list of who could: free that period, teaches the subject, lightest day. The substitute is told and sees it on their Today.

THE STRUCTURE

Timetable and week

Periods, clash checks, copy a day, a configurable teaching week. Sunday schools and five-day schools both fit.

THE TERM

Syllabus coverage

Chapter lists per grade and subject; classes tick through them as lessons are taught. The head sees each class against where the year stands.

THE YEAR

Teacher reviews

Review rounds with pupil and parent feedback, anonymous to the teacher, summarised for the principal.

SAFETY AND TRUST

Security a school can inspect, not take on faith

Health and emergency cards

Blood group, allergies, conditions, medication, doctor and emergency contacts, kept by the parent; flags on the roster; height, weight and vision checks by the office.

Incident log

Injury, illness, behaviour, safeguarding: recorded once, guardians notified, notes added, closed by the office. Nothing edited after the fact.

Isolated by the database

Each school's data is fenced by PostgreSQL row-level security. The app connects as a role that cannot bypass it; one command proves the isolation.

Minors protected by design

Guardian consent gates anything that leaves the school. Photos are stripped of location data. Birthdates are for staff only. A written minors' data policy comes with the product.

Nothing vanishes, nothing leaks

A complete audit trail, including failed logins. Suspensions and removals are recorded with reasons. Sessions expire; devices can be signed out.

Frozen where it matters

Report cards, receipts and leaving certificates are documents: what a family saw can never silently change.

The daily loop, closed

07:55

Teachers check in

"I'm in" on the phone; the office's staff register fills itself. One teacher rang in unwell.

08:05

Cover arranged

The substitution board lists her five lessons; the office assigns a free colleague to each. They see it on Today.

08:15

Registers taken

Every class, on a phone, in a minute. Absent pupils' parents get an alert in their language.

10:30

Work set and marked

An assignment with a worksheet; yesterday's hand-ins, some photographed, marked and weighted into the term.

13:00

A circular goes out

Sports day notice to every family; by evening the office sees 71 % acknowledged and reminds the rest tomorrow.

16:30

The owner looks

Attendance 94 %, two classes behind on syllabus, fees due this week, one incident closed. Nothing had to be reported.

SIDE BY SIDE

The old way, the usual software, and Relay

	Paper + WhatsApp	Typical school ERP	Relay
Morning register	Bound register, totalled monthly	Typed in later by a clerk	Tapped in class, offline; parents alerted the same day
A notice to families	Forwarded to eight groups	Posted on a portal nobody opens	Reach report: told, seen, acknowledged, unreached; reminders to the silent
Marks and report cards	Excel per teacher, retyped	Entered on a desktop	Entered once on a phone, weighted, frozen at issue
Fees	Ledger and phone calls	Vendor gateway holds the money	School's own UPI or gateway; Relay never holds money
An absent teacher	Decided in the corridor	Not covered	Board ranks who is free and told; cover on the timetable
Language	Whatever the teacher types	English	English, Hindi, Marathi throughout
Records at year end	In a cupboard	In the vendor's database	Archived per year, exportable, isolated per school
Cost model	Staff hours	Per module, per user, plus a gateway cut	₹200 per pupil per year; everything included; no commission on fees

PROVEN, NOT PROMISED

What already runs today

3,000+

automated tests run on every change, web and phone

490+

pages walked as every role, every link the app draws

312

documented API endpoints the phone app is built on

3

languages throughout: English, Hindi, Marathi

- **Built for real conditions.** Offline-first for no-signal classrooms; an Android app and a web app that installs from the browser; +91-aware phone handling and DLT-compliant SMS for India; Monday-to-Saturday or any teaching week.
- **One price, everything in.** ₹200 per pupil per year covers every feature on these slides for every role. Each school's data is fenced by the database on one shared, affordable deployment.
- **Every claim on this slide is reproducible.** The tests, the route walk and the isolation proof each run with one command, and we will run them in front of you.
- **A full demo school, seeded and live.** Log in as its principal, office, a teacher, a parent and a pupil and see a real term's data. Access on request.

A LOW-RISK PATH TO ADOPTION

Start with one class. Stop if mornings are not easier by day three.

DAY 1

Set up

Thirty minutes: the school, its classes and calendar. Pupils and staff imported from the Excel sheets you already have. Join codes go home in the family's language.

WEEKS 1–2

Pilot one class

One teacher takes the register and messages parents through Relay. Nothing else changes.

FIRST TERM

One grade

Assignments, marks, circulars and fees go live for a grade; its families are onboarded with join codes.

FULL YEAR

The whole school

Exams, report cards, promotion, transfers and the staff room: the complete yearly loop, with every record preserved from day one.

What we need from you: thirty minutes with the office and one class teacher, the pupil and staff lists you already keep, and one class willing to try it for a fortnight. Training is on the phone, in the language the teacher prefers.

WHAT IS NEXT

Built in the open, in the order schools ask for it

IN PROGRESS

Configurable report card

Board grading scales, co-scholastic grades, term weighting, the school's own layout, PDF.

NEXT

Certificates and ID cards

Bonafide, character and study certificates, and pupil ID cards, issued and numbered from the record.

NEXT

Admissions workflow

Application form, documents, entrance slot, offer, and the handoff to fees.

PLANNED

UDISE+ and board filings

The government and board returns exported in the portals' own formats.

PLANNED

Housekeeping

Retention rules for sessions, tokens and the audit log, set by the school.

OPEN

Your request here

Schools on Relay set the order. What would change your Monday?

WHAT IT COSTS

₹200 per pupil, per year. Everything included.

₹200 per pupil, per year

One price for the whole platform: every feature on these slides, for every role, including parents and alumni. No modules, no tiers, no per-user seats for staff.

Onboarding included

Import of your existing lists, join codes for every family, and phone-based training for staff in their language.

No commission on fees

Fees go to the school's own account. SMS and WhatsApp are billed at the operator's rate with no markup; push and in-app messages are free.

Leave any time, with your data

Every table exports to Excel. There is no lock-in because there is nothing to lock.

COMPARED WITH TODAY

A school of 500 pupils pays ₹1,00,000 a year: about ₹8,300 a month, less than one clerical salary, for the whole school.

Count what it replaces: a teacher's daily totalling and forwarding, a clerk's fee ledger, the office's search for who is free at eleven. Relay costs less than the clerical hours it returns to teaching, and the first term is the proof.

The school already creates this data every day. Relay makes sure it reaches the people it was for.

NEXT STEP

Thirty minutes with your office and one class teacher. We set up your school in the meeting, hand you the demo school to explore, and pick the class that starts on Monday.

SEE IT TODAY

A complete demo school is live: log in as its principal, office, a teacher, a parent and a pupil. Ask us for access and open it on your own phone during this meeting.

Relay — school, home, connected.
